Business Networking Inspiration

We invite you to join us for two days of inspiration, networking and business, in the company of elite architects, landscape designers, urbanists, engineers and entrepreneurs from **Romania, the Netherlands, Belgium, Poland, Bulgaria, Turkey, Italy and Poland.**

INGLASS, LAUD, New Cities represent a complex series of events, from a **conceptual conference** which inspires those who master urban development, infrastructure and landscape policies, to **specialized thematic conferences** and **masterclasses** that offer a **common ground for debate and discussions.**

For the first time in a public inspirational conference in Romania, at New Cities, on **13th June**, **representatives of the cultural environment, architects, ambassadors, entrepreneurs and decision making factors of the administration of large cities will share their vision on new cities, on the future in architecture and urbanism.** Among the topics discussed there will be the **current urban challenges**, including smart building solutions, infrastructure or management solutions **meant to improve the quality of urban life and lead to the development of "human cities", friendly cities to inhabitants.** **New Cities, a unique inspirational event, is about the participation and involvement in urban life, about the way in which the individual must be brought back to the heart of this discussion on the future of urbanism.**

Taking place on **13-14 th June**, **INGLASS & LAUD**, the forum dedicated to **landscape architecture, urban infrastructure and glass architecture and engineering**, will reveal **iconic projects, ground-breaking designs** presented by **prominent speakers, winners of the most recent editions of national and international competitions.** The thematic plenary sessions of the forum include presentations on **four main topics: landscape architecture, regeneration and urban infrastructure, glass architecture, design in architecture.**

The event is part of the international expo conferences organized in **Bucharest, Kraków, Warsaw and Budapest** by ABplus Events and the cultural association ProEvent, in cooperation with the representatives of the national chambers of architects.

TETSUO HARADA

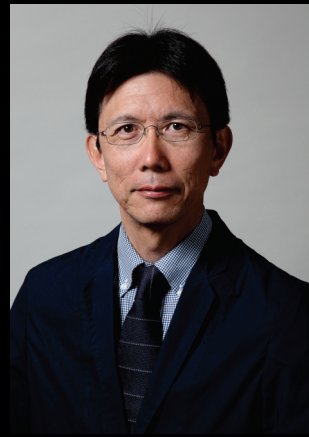

Architect, General manager Design Department,
Takenaka corporation, JAPAN

Keynote Speaker INGLASS Bucharest 2016 edition

MASTER CLASS

"DESIGN AND ENGINEERING OF THE SUPERTALL COMPACT CITY - ABENO HARUKAS "

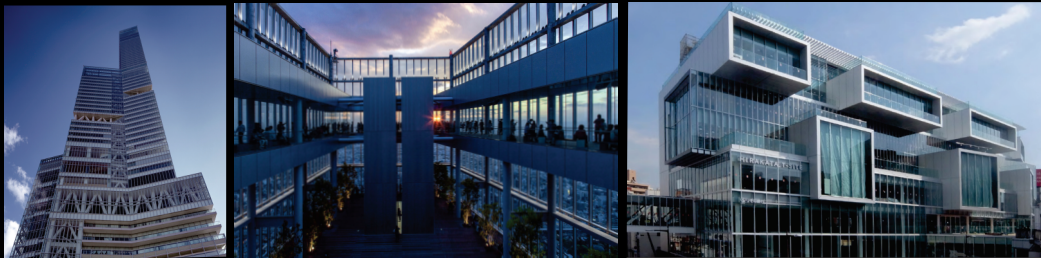

about glass facade
engineering

Arch. Tetsuo HARADA was born in Osaka, Japan and graduated from Department of Architecture, Kyoto University. He had joined Takenaka Corporation in 1986.

Currently he is the General Manager of Building Design Department of Takenaka Corporation in Osaka and also teaches at Osaka University. In all of the cutting-edge commercial buildings that arch. Harada has designed, the connection of architecture with city and nature is the main theme. It is based on wisdom in Japanese traditional urban dwellings, as represented by "Machiya", a highly sophisticated environmental architecture in high-density cities.

Abeno Harukas is the tallest building in Japan and one of the world's tallest buildings directly over a railway terminal. It is a high-density urban complex incorporating a department store, art museum, college, clinic, office, hotel, observatory and roof top gardens above the railway terminal. At about 300 meters high, Abeno Harukas is the future of multifunctional urban space in the sky.

AWARDS

Best Tall Building Asia & Australasia in the CTBUH
AWARD 2014 (regional Finalist)
MIPIM ASIA AWARD 2014 (Winner)
Building Contractors Society (BCS Prize) 2015
Urban Greening Award 2015 *Organization for
Landscape and urban Infrastructure
JCD AWARD (Gold Prize) *JCD: Japan Commercial
Environmental Design Association
The Prize of AIJ *AIJ: Architectural Institute of Japan

20 guests speakers

from Japan, The Netherlands,
Belgium, Turkey, Hungary, Poland
and Romania

representatives of the cultural
environment, architects, ambassadors,
entrepreneurs and decision making
factors of the administration of large
cities will participate in the interactive
conference

NEW CITIES

The guests will witness a lively, ample
debate, for the first time in Romania,
which will centre around the quality
of life in big cities, from multiple
perspectives : of the architect, the
administrator of the municipality, of
the anthropologist, of the
entrepreneur and of the civil society.

The international
inspirational
conference on the
future in architecture
and urbanism

"GREEN CITIES"

MASTER CLASS

by landscape arch. **Niek Roozen**
Managing director of **Niek Roozen Ltd**, the Netherlands
and director and representative
of **NRL (Netherlands Landscape Design Shenyang Ltd.)** in
Shenyang

AWARDS

Excellent foreign expert Ningbo Peoples Government
2016 First Prize Design competition QinHuai River Project Nanjing
2014 First prize for Main Axis Hunnan in Shenyang for excellent engineering survey and design of municipal engineering in Liaoning province
2014 Second prize for Mozi Mountain Park for excellent engineering survey and design of municipal engineering in Liaoning province
2006 First prize design competition EXPO Park at the World Expo 2010 in Shanghai

Niek Roozen has been a landscape architect since 1974. He and his team have worked, both nationally and internationally, on a variety of projects such as city parks, horticulture exhibitions and theme parks.

Roozen was the chief architect of the World Horticultural Exhibition Floriade 2002 in the Netherlands. At this exhibition Niek Roozen Ltd. introduced the Green City philosophy, a green strategy for city development, utilizing the positive influence plants have on the improvement of our environment.

In 2005, landscape architect Niek Roozen was appointed the General Advisor of the Shenyang International Horticultural Exhibition 2006. After realising this successfully Niek Roozen BV made the designs of the urban green structure of the new residential areas like: Changbai, Manrong and Hunnan in cooperation with Shenyang Landscape Institute and Arktree Shenyang.

Landscape designs were made for the Hunnan Baita Park, Mozi Mountain Park and the design for Hun River North and South. For new residential area Hunnan (500.000 inhabitants) the design was made for the main axis with a length of 4,5 km. Recently.

At this moment the designs are being made for 10 km2 The Xiu lake Wetland park and the Shenyang National Forest Park.
